Volatility	Volatility measures the magnitude of an asset's price fluctuations and thus provides an estimate of its risk (mathematically, volatility is the standard deviation between the asset's returns).
Tracking error	This is the measure of the risk taken by the portfolio relative to its benchmark.
Sharpe ratio	The Sharpe ratio measures the difference between the portfolio's return and the risk-free rate divided by the portfolio's volatility.
Information ratio	This is the difference between the portfolio's return and the benchmark's return divided by tracking error.
Reta	The heta is the measure of the nortfolio's sensitivity relative to its henchmark

### Management commentary

In September, convertible bonds performed well in a bullish European equity market environment. The broad Euro Stoxx stock index ended the  $month\ up\ 2.8\%.\ Depending\ on\ their\ benchmark\ indices,\ European\ convertible\ bonds\ posted\ a\ very\ slightly\ negative\ performance\ of\ -0.1\%\ or\ a$ positive performance of +0.5%. Unsurprisingly, the sector positioning did not benefit convertibles, with real estate (such as Leg Immobilien -6%), chemicals (such as Evonik -12%) and telecoms (such as Cellnex -4%) underperforming. Nevertheless, other sectors drove performance, notably tech, with ASML gaining 30%.

The primary market was buoyant during the month, with €1.6 billion in three issues, two of which were Investment Grade from issuers that have already issued convertible bonds: Lufthansa with €600 million and Schneider with €750 million. The last was Exail Technologies in the marine

Despite this active primary market and liquid markets, intrinsic valuations of convertible bonds contracted slightly, from 29.5% implied volatility on average for the pool to 28.5%. Over the month, implied spreads remained stable at 145bp, as did interest rates, with the German 10-year yield at 2.7%.

During the month, we participated in the Schneider issue and added to our positions in MTU Aero Engines, SAP and TAG Immobilien. Using options, we once again added exposure to LVMH and took profits on IAG.

# LBPAM ISR CONVERTIBLES EUROPE I

**EXTRA-FINANCIAL REPORT AS OF 30 SEPTEMBER 2025** 

# GREaT PROFILE OF THE PORTFOLIO

ESG approach	Score improvement <sup>1</sup>
Comparison universe restatement rate	25%
Weighted average GREaT score for the portfolio	7.48
Weighted average GREaT score for the restated comparison universe <sup>2</sup>	6.80

The GREaT score is based on an ESG analysis methodology proprietary to the LBP AM Group. The GREaT score scale ranges from 1 to 10, with 10 representing the highest ESG quality of an issuer.

<sup>1</sup> The 'score improvement' ESG approach consists in obtaining a weighted average GREaT score for the portfolio that is higher

than that of the restated comparison universe.

The restated comparison universe corresponds to the universe from which we have removed a percentage of issuers corresponding to the restatement rate of the comparison universe - being on an exclusion list applicable to the portfolio and/or having the worst GREaT scores.

ESG: Environmental, Social and Governance criteria

To find out more about the composition of the comparison universe, please consult the fund prospectus.

### GREAT METHODOLOGY

## Responsible governance

Encourage the dissemination of best practices in terms of corporate governance and business ethics.

## Sustainable Resource Management

Sustainable management of human and natural resources; respect for human rights, development of labour laws, sustainable relations with suppliers, environmental protection.

### **Energy Transition**

Mitigating climate risks by supporting the transition from a high-carbon economic model to a more sober and sustainable

### **Territorial Development**

Type of comparable Comparison universe

Promote responsible practices that meet the Sustainable Development Goals and create value for all stakeholders in the

	Portfolio	Portfolio coverage	Comparable	Comparable coverage
G - Responsible Governance	6.62	100.0%	6.14	99.9%
R - Sustainable Resource Management	6.84	100.0%	5.97	99.9%
E - Energy Transition	7.22	100.0%	6.27	99.9%
T - Territorial Development	7.20	100.0%	6.11	96.8%

As the fund does not make any performance commitments relative to its peer group on the GREaT pillars, the portfolio's rating may be higher or lower than that of its peer group.

### Breakdown of portfolio and comparison universe by GREaT Score

### Best GREaT Scores of the portfolio and Contribution of each pillar to the issuer's GREaT Score

Issuer name	Weight in the portfolio	GREaT score	G	R	E	T
ACCOR SA	3.6%	9.60	0.2%	45.2%	4.5%	50.1%

# LBPAM ISR CONVERTIBLES EUROPE I

EXTRA-FINANCIAL REPORT AS OF 30 SEPTEMBER 2025

# PORTFOLIO SUSTAINABILITY INDICATORS

	Portfolio	Minimum commitment
Percentage of Sustainable Investment	74.1%	20.0%

According to the European SFDR (Sustainable Finance Disclosure Regulation), sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The percentage of sustainable investment presented here is based on the LBP AM Group's proprietary methodology, available in full on our website: https://www.lbpam.com/fr/publications/methodologie-investigations/methodologie-i

Indicator 1 - Environment	Portfolio	Comparable
Net Zero Alignment	65.7%	50.7%

Portfolio

Comparison universe

#### Indicator 1 methodology:

Indicator name and source	Definition	Unit of measure
Net Zero trajectory Source(s) : CDP_TEMP	Share of companies whose greenhouse gas emission reduction targets are validated by SBTI.	%

### Indicator 2 methodology:

Indicator name and source	Definition	Unit of measure
	Average ratio of female to male	
Board gender diversity Source(s) : MSCI,ASSET4,GAIARATING	board members in investee companies, expressed as a percentage of all board members.	Average % Of Women in Board

For more information on the methodologies used to calculate sustainability indicators and on our approach as a responsible investor, please refer to the documents available on our website at https://www.lbpam.com/fr/publications/methodologie-investissements-durables

The French State's SRI label is valid for a limited period and is subject to reassessment. Furthermore, the fact that a UCI has been awarded the label does not mean that it meets your own sustainability objectives, or that the label meets the requirements of future national or European regulations.

## PORTFOLIO'S NON-FINANCIAL OBJECTIVE

The financial product's SRI management approach consists of identifying companies with the best sustainable development practices, according to the management company's analysis.

This analysis is based on the GREaT philosophy, specific to the management company, articulated around the following four pillars:

- Responsible governance: this pillar aims to assess the organisation and effectiveness of powers within issuers (balance of power, executive remuneration, business ethics).
- Sustainable management of resources: this pillar looks at the environmental impact and the management of the human capital of issuers (quality of working conditions and management of relations with suppliers).
- Economic and energy transition: this pillar assesses the issuer's strategy in favour of energy transition (greenhouse gas reduction and response to long-term challenges).
- Regional development: this pillar analyses the issuer's strategy in terms of access to basic services.

Several criteria are identified for each pillar and monitored using indicators collected from non-financial rating agencies (MSCI ESG Research, Moody's ESG and EthiFinance Ratings).

The methodology used reduces bias, particularly capital and sector bias

Ultimately, the management company is the sole judge of an issuer's non-financial quality, which is expressed:

- According to a GREaT score between 1 and 10 – 10 representing the best ESG quality of an issuer.

In addition, the management company applies sectoral and normative exclusions designed to limit investment in issuers with excessive adverse impacts. Our sector exclusion lists include certain issuers from controversial sectors such as tobacco, gambling, coal, oil and gas, according to criteria defined by the management company. Our normative exclusion list is based on analyses of ESG controversies or allegations and identifies cases of severe, systematic and uncorrected violations of ESG rights or infringements. In addition to the management company's common exclusion base, portfolios that hold the French government's SRI label comply with the mandatory exclusions listed in its guidelines.
