TOCQUEVILLE EURO EQUITY SRI GP

MONTHLY FINANCIAL REPORT AS OF 27 FEBRUARY 2026

Investment objective

The Subfund has two investment objectives : - to obtain, over the recommended investment period of at least 5 years, stock market returns and - to pursue a sustainable investment objective by implementing a SRI strategy and by investing in companies that provide solutions to the main challenges of sustainable development according to the analysis of the Management Company and the Investment Management Delegate..

Fund Size	2,639.16 M€

Data calculated on the valuation step

	Historical max. drawdown	Beginning of the max. drawdown	End of the max. drawdown	Recovery time
Max. drawdown since inception	-35.17%	19/02/2020	18/03/2020	252 day(s)

Volatility	Volatility measures the magnitude of an asset's price fluctuations and thus provides an estimate of its risk (mathematically, volatility is the standard deviation between the asset's returns).
Tracking error	This is the measure of the risk taken by the portfolio relative to its benchmark.
Sharpe ratio	The Sharpe ratio measures the difference between the portfolio's return and the risk-free rate divided by the portfolio's volatility.
Information ratio	This is the difference between the portfolio's return and the benchmark's return divided by the tracking error.
Beta	The beta is the measure of the portfolio's sensitivity relative to its benchmark.

Monthly Comments

Eurozone equities rose over the month despite uncertainties. Although index volatility increased, it remained well below daily intra-market fluctuations. The topic of AI once again spooked the market, which is being buffeted by contradictory and/or extravagant analyses. In addition, the US Supreme Court ruled against the legal validity of certain laws justifying unilaterally imposed customs duties. Against this backdrop, the portfolio posted gains but ended below its benchmark index. The last week of the month weighed on the portfolio, particularly Syensqo, whose annual results triggered a sharp decline in its share price.

The healthcare, real estate and banking sectors made the most positive contributions, while energy, technology and raw materials were the sectors that contributed most negatively to the fund's relative performance. We made changes to the portfolio during the month. In particular, we sold Publicis and Renault and bought AstraZeneca and ISS.

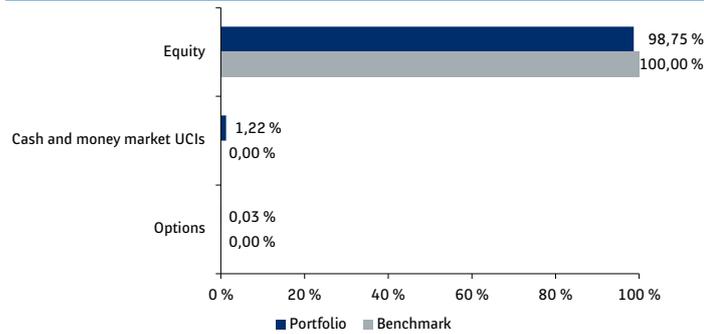

TOCQUEVILLE EURO EQUITY SRI GP

MONTHLY ESG REPORT AS OF 27 FEBRUARY 2026

GREaT PROFILE OF THE PORTFOLIO

ESG approach	Score improvement ¹
Comparison universe restatement rate	30%
Weighted average GREaT score for the portfolio	7.57
Weighted average GREaT score for the restated comparison universe ²	7.51

The GREaT score is based on an ESG analysis methodology proprietary to the LBP AM Group. The GREaT score scale ranges from 1 to 10, with 10 representing the highest ESG quality of an issuer.

¹ The 'score improvement' ESG approach consists in obtaining a weighted average GREaT score for the portfolio that is higher than that of the restated comparison universe.

² The restated comparison universe corresponds to the universe from which we have removed a percentage of issuers - corresponding to the restatement rate of the comparison universe - being on an exclusion list applicable to the portfolio and/or having the worst GREaT scores.

ESG: Environmental, Social and Governance criteria

To find out more about the composition of the comparison universe, please consult the fund prospectus.

GREaT METHODOLOGY

Responsible governance

Encourage the dissemination of best practices in terms of corporate governance and business ethics.

Sustainable Resource Management

Sustainable management of human and natural resources: respect for human rights, development of labour laws, sustainable relations with suppliers, environmental protection.

Energy Transition

Mitigating climate risks by supporting the transition from a high-carbon economic model to a more sober and sustainable model.

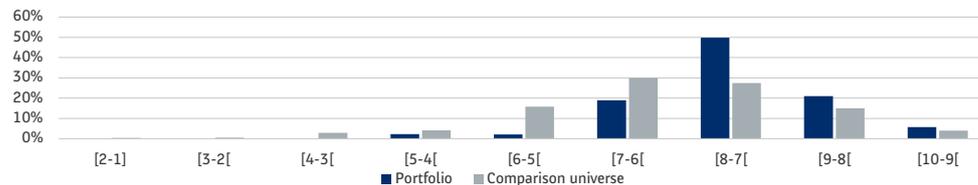

Territorial Development

Promote responsible practices that meet the Sustainable Development Goals and create value for all stakeholders in the value chain.

	Portfolio	Portfolio coverage	Comparable	Comparable coverage	Type of comparable
G - Responsible Governance	7.22	100.0%	6.67	100.0%	Comparison universe
R - Sustainable Resource Management	6.88	100.0%	6.35	100.0%	
E - Energy Transition	7.53	100.0%	6.70	100.0%	
T - Territorial Development	6.76	100.0%	6.36	100.0%	

As the fund does not make any performance commitments relative to its peer group on the GREaT pillars, the portfolio's rating may be higher or lower than that of its peer group.

Breakdown of portfolio and comparison universe by GREaT score

Best GREaT Scores of the portfolio and Contribution of each pillar to the issuer's GREaT Score

Issuer name	Weight in the portfolio	GREaT score	G	R	E	T
SCHNEIDER ELECTRIC SE	4.3%	9.64	16.9%	33.8%	33.2%	16.1%
INDUSTRIA DE DISEÑO TEXTIL SA	1.4%	9.51	19.5%	30.2%	19.5%	30.8%
SIEMENS AG	2.9%	8.88	0.3%	21.5%	30.3%	47.9%
ALSTOM SA	1.1%	8.83	10.8%	36.6%	27.1%	25.5%
CELLNEX TELECOM SA	1.4%	8.77	32.0%	37.6%	5.7%	24.6%

TOCQUEVILLE EURO EQUITY SRI GP

MONTHLY ESG REPORT AS OF 27 FEBRUARY 2026

PORTFOLIO SUSTAINABILITY INDICATORS

	Portfolio	Minimum commitment
Percentage of Sustainable Investment	62.5%	40.0%

According to the European SFDR (Sustainable Finance Disclosure Regulation), sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices. The percentage of sustainable investment presented here is based on the LBP AM Group's proprietary methodology, available in full on our website: <https://www.lbpam.com/fr/publications/methodologie-investissements-durables>

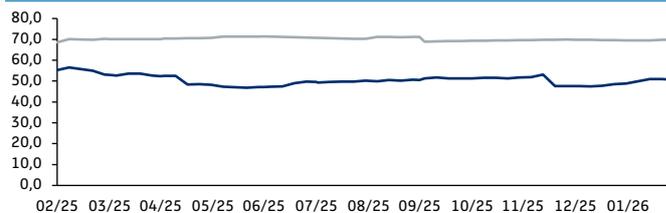

Indicator 1 - Environment	Portfolio	Comparable
Carbon Footprint (Scope 1+2+3)	421.1	662.4
Coverage rate	98.1%	92.8%

Indicator 2 - Environment	Portfolio	Comparable
Biodiversity footprint - GBS	50.7	69.8
Coverage rate	97.0%	96.3%

HISTORICAL PERFORMANCE OF INDICATOR 1

HISTORICAL PERFORMANCE OF INDICATOR 2

■ Portfolio ■ Comparison universe

Indicator 1 methodology :

Indicator name and source	Definition	Unit of measure
Carbon Footprint (Scope 1 + 2 + 3) Source(s) : MSCI	Measures CO2 emissions attributable to the fund's investments. This indicator is expressed in tCO2 per million euros invested and covers all emissions, i.e., scope 1, 2, and 3.	tCO2/€m invested

Indicator 2 methodology :

Indicator name and source	Definition	Unit of measure
Biodiversity impact (BIA-GBSTM) Source(s) : CDC_BIO	GBS: Global Biodiversity Score - estimate of a company's impact on biodiversity, taking into account its historical activity, related to land artificialisation, overexploitation of resources, pollution and climate change. The higher the score, the greater the company's impact on biodiversity.	MSA.ppb*/b€ invested

For more information on the methodologies used to calculate sustainability indicators and on our approach as a responsible investor, please refer to the documents available on our website at <https://www.lbpam.com/fr/publications/methodologie-investissements-durables>. The French State's SRI label is valid for a limited period and is subject to reassessment. Furthermore, the fact that a UCI has been awarded the label does not mean that it meets your own sustainability objectives, or that the label meets the requirements of future national or European regulations.

PORTFOLIO'S NON-FINANCIAL OBJECTIVE

The financial product's SRI management approach consists of identifying companies with the best sustainable development practices, according to the management company's analysis.

This analysis is based on the GREaT philosophy, specific to the management company, articulated around the following four pillars:

- Responsible governance: this pillar aims to assess the organisation and effectiveness of powers within issuers (balance of power, executive remuneration, business ethics).
- Sustainable management of resources: this pillar looks at the environmental impact and the management of the human capital of issuers (quality of working conditions and management of relations with suppliers).
- Economic and energy transition: this pillar assesses the issuer's strategy in favour of energy transition (greenhouse gas reduction and response to long-term challenges).
- Regional development: this pillar analyses the issuer's strategy in terms of access to basic services.

Several criteria are identified for each pillar and monitored using indicators collected from non-financial rating agencies (MSCI ESG Research, Moody's ESG and Ethifinance Ratings).

The methodology used reduces bias, particularly capital and sector bias.

Ultimately, the management company is the sole judge of an issuer's non-financial quality, which is expressed:

- According to a GREaT score between 1 and 10 - 10 representing the best ESG quality of an issuer.

In addition, the management company applies sectoral and normative exclusions designed to limit investment in issuers with excessive adverse impacts. Our sector exclusion lists include certain issuers from controversial sectors such as tobacco, gambling, coal, oil and gas, according to criteria defined by the management company. Our normative exclusion list is based on analyses of ESG controversies or allegations and identifies cases of severe, systematic and uncorrected violations of ESG rights or infringements. In addition to the management company's common exclusion base, portfolios that hold the French government's SRI label comply with the mandatory exclusions listed in its guidelines.
