LBPAM ISR CONVERTIBLES EUROPE L

MONTHLY REPORT AS OF 30 SEPTEMBER 2025

Investment objective

The Fund has a dual management objective: - to outperform, over the recommended investment period greater than 4 years, the European convertible bond markets' reference indicator, through investments in European convertible bonds. This objective will be achieved with an actively-managed portfolio, invested primarily in Investment Grade securities (rated at least BBB- / Baa3 or of a rating deemed equivalent by the management company in accordance with the Basel method). - to implement a socially responsible investment (SRI) strategy.

Volatility	Volatility measures the magnitude of an asset's price fluctuations and thus provides an estimate of its risk (mathematically, volatility is the standard deviation between the asset's returns).
Tracking error	This is the measure of the risk taken by the portfolio relative to its benchmark.
Sharpe ratio	The Sharpe ratio measures the difference between the portfolio's return and the risk-free rate divided by the portfolio's volatility.
Information ratio	This is the difference between the portfolio's return and the benchmark's return divided by tracking error.
Beta	The beta is the measure of the portfolio's sensitivity relative to its benchmark.

Management commentary

In September, convertible bonds performed well in a bullish European equity market environment. The broad Euro Stoxx stock index ended the month up 2.8%. Depending on their benchmark indices, European convertible bonds posted a very slightly negative performance of -0.1% or a positive performance of +0.5%. Unsurprisingly, the sector positioning did not benefit convertibles, with real estate (such as Leg Immobilien -6%), chemicals (such as Evonik -12%) and telecoms (such as Cellnex -4%) underperforming. Nevertheless, other sectors drove performance, notably tech, with ASML gaining 30%.

The primary market was buoyant during the month, with €1.6 billion in three issues, two of which were Investment Grade from issuers that have already issued convertible bonds: Lufthansa with €600 million and Schneider with €750 million. The last was Exail Technologies in the marine drones sector, which issued a €300 million bond.

Despite this active primary market and liquid markets, intrinsic valuations of convertible bonds contracted slightly, from 29.5% implied volatility on average for the pool to 28.5%. Over the month, implied spreads remained stable at 145bp, as did interest rates, with the German 10-year yield at 2.7%.

During the month, we participated in the Schneider issue and added to our positions in MTU Aero Engines, SAP and TAG Immobilien. Using options, we once again added exposure to LVMH and took profits on IAG.
