Data calculated according to valuation frequency.

	Historical max. drawdown	Beginning of the max. drawdown	End of the max. drawdown	Recovery delay
Max. drawdown since inception	7.83%	16/08/2022	30/10/2023	102 days

Volatility	Volatility measures the magnitude of an asset's price fluctuations and thus provides an estimate of its risk (mathematically, volatility is the standard deviation between the asset's returns).
Tracking error	This is the measure of the risk taken by the portfolio relative to its benchmark.
Sharpe ratio	The Sharpe ratio measures the difference between the portfolio's return and the risk-free rate divided by the portfolio's volatility.
Information ratio	This is the difference between the portfolio's return and the benchmark's return divided by tracking error.
Beta	The beta is the measure of the portfolio's sensitivity relative to its benchmark.

Management commentary

In April, global convertible bonds performed well in an environment of stable but hesitant equity markets. The broad US, European and Chinese equity indices were negative (SPX -1%, SXXT -2%, HSCEI -4%), and thanks to good sector representation, global convertible bonds represented by their benchmark index gained 0.7%. The sector positioning benefited convertibles, with an outperformance by Utilities, Real Estate and Technology.

The primary market, which had a good start to the year, was less prolific in April, in the midst of the earnings season with an amount of nearly \$2.5 billion. €850m in Europe with a BofA exchangeable into SAP and a €150m tap on a Vinci 2030 issue made in February, \$1.4bn in the US with Lucid and Norwegian Cruise and the rest in Asia.

With this consistent primary activity and weak markets, the intrinsic valuations of convertible bonds increased slightly with an average for the overall pool of 36.5%. Implied spreads also remained stable overall at around 204bp while interest rates dropped slightly during the month: the 10-year in the US went from 4.21% to 4.16%.

During the month, we reduced our equities position resulting from the conversion into BNP and participated in the BofA primary issue into SAP.

EXTRA-FINANCIAL REPORT AS OF 30 APRIL 2025

GREaT PROFILE OF THE PORTFOLIO

ESG approach	Score improvement ¹
Comparison universe restatement rate	25%
Weighted average GREaT score for the portfolio	6.99
Weighted average GREaT score for the restated comparison universe ²	6.85

The GREaT score is based on an ESG analysis methodology proprietary to the LBP AM Group. The GREaT score scale ranges from 1 to 10, with 10 representing the highest ESG quality of an issuer.

¹ The 'score improvement' ESG approach consists in obtaining a weighted average GREaT score for the portfolio that is higher than that of the restated comparison universe.

² The restated comparison universe corresponds to the universe from which we have removed a percentage of issuers - corresponding to the restatement rate of the comparison universe - being on an exclusion list applicable to the portfolio and/or having the worst GREaT scores.

ESG: Environmental, Social and Governance criteria

To find out more about the composition of the comparison universe, please consult the fund prospectus.

GREaT METHODOLOGY

 Responsible governance Encourage the dissemination of best practices in terms of corporate governance and business ethics.	 Sustainable Resource Management Sustainable management of human and natural resources: respect for human rights, development of labour laws, sustainable relations with suppliers, environmental protection.
 Energy Transition Mitigating climate risks by supporting the transition from a high-carbon economic model to a more sober and sustainable model.	 Territorial Development Promote responsible practices that meet the Sustainable Development Goals and create value for all stakeholders in the value chain.

	Portfolio	Portfolio coverage	Comparable	Comparable coverage	Type of comparable
G - Responsible Governance	5.91	100.0%	6.00	99.9%	Comparison universe
R - Sustainable Resource Management	6.37	100.0%	6.07	99.9%	
E - Energy Transition	6.95	100.0%	6.47	99.9%	
T - Territorial Development	6.77	98.0%	6.23	98.0%	

As the fund does not make any performance commitments relative to its peer group on the GREaT pillars, the portfolio's rating may be higher or lower than that of its peer group.

Breakdown of portfolio and comparison universe by GREaT Score

Best GREaT Scores of the portfolio and Contribution of each pillar to the issuer's GREaT Score

Issuer name	Weight in the portfolio	GREaT score	G	R	E	T

EXTRA-FINANCIAL REPORT AS OF 30 APRIL 2025

PORTFOLIO SUSTAINABILITY INDICATORS

	Portfolio	Minimum commitment
Percentage of Sustainable Investment	56.0%	20.0%

According to the European SFDR (Sustainable Finance Disclosure Regulation), sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices. The percentage of sustainable investment presented here is based on the LBP AM Group's proprietary methodology, available in full on our website: <https://www.lbpam.com/fr/publications/methodologie-investissements-durables>

Indicator 1 - Environment	Portfolio	Comparable
Net Zero Alignment	37.3%	35.2%
Coverage rate	100.0%	100.0%

HISTORICAL PERFORMANCE OF INDICATOR 1

■ Portfolio ■ Comparison universe

Indicator 1 methodology

Indicator name and source	Definition	Unit of measure
Net Zero trajectory Source(s) : CDP_TEMP	Share of companies whose greenhouse gas emission reduction targets are validated by SBTi.	%

Indicator 2 - Governance	Portfolio	Comparable
Board gender diversity	36.7%	35.2%
Coverage rate	92.2%	94.7%

HISTORICAL PERFORMANCE OF INDICATOR 2

Indicator 2 methodology

Indicator name and source	Definition	Unit of measure
Board gender diversity Source(s) : MSCI,ASSET4,GAIRATING	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members.	Average % Of Women in Board

For more information on the methodologies used to calculate sustainability indicators and on our approach as a responsible investor, please refer to the documents available on our website at <https://www.lbpam.com/fr/publications/methodologie-investissements-durables>. The French State's SRI label is valid for a limited period and is subject to reassessment. Furthermore, the fact that a UCI has been awarded the label does not mean that it meets your own sustainability objectives, or that the label meets the requirements of future national or European regulations.

PORTFOLIO'S NON-FINANCIAL OBJECTIVE

The financial product's SRI management approach consists of identifying companies with the best sustainable development practices, according to the management company's analysis.

This analysis is based on the GREaT philosophy, specific to the management company, articulated around the following four pillars:

- Responsible governance: this pillar aims to assess the organisation and effectiveness of powers within issuers (balance of power, executive remuneration, business ethics).
- Sustainable management of resources: this pillar looks at the environmental impact and the management of the human capital of issuers (quality of working conditions and management of relations with suppliers).
- Economic and energy transition: this pillar assesses the issuer's strategy in favour of energy transition (greenhouse gas reduction and response to long-term challenges).
- Regional development: this pillar analyses the issuer's strategy in terms of access to basic services.

Several criteria are identified for each pillar and monitored using indicators collected from non-financial rating agencies (MSCI ESG Research, Moody's ESG and Ethifinance Ratings).

The methodology used reduces bias, particularly capital and sector bias.

Ultimately, the management company is the sole judge of an issuer's non-financial quality, which is expressed:

- According to a GREaT score between 1 and 10 – 10 representing the best ESG quality of an issuer.

In addition, the management company applies sectoral and normative exclusions designed to limit investment in issuers with excessive adverse impacts. Our sector exclusion lists include certain issuers from controversial sectors such as tobacco, gambling, coal, oil and gas, according to criteria defined by the management company. Our normative exclusion list is based on analyses of ESG controversies or allegations and identifies cases of severe, systematic and uncorrected violations of ESG rights or infringements. In addition to the management company's common exclusion base, portfolios that hold the French government's SRI label comply with the mandatory exclusions listed in its guidelines.
