TOCQUEVILLE BIODIVERSITY ISR R

MONTHLY FINANCIAL REPORT AS OF 30 SEPTEMBER 2025

Investment objective

The Fund's investment objective is twofold: - to seek to offer investors, over the recommended investment period of at least five years, a performance linked to a portfolio made up of shares of companies, with no restrictions in terms of geographical region, sector or capitalisation; - to pursue a sustainable investment objective by investing in the shares of virtuous companies meeting SRI criteria (environmental, social and governance) in sectors related to the biodiversity theme based on the analysis of the Delegated Investment Manager. In these sectors we find "Solutions" companies, which via their goods or services directly reduce the impact of human activities on biodiversity, or companies carrying out diversified activities with a high biodiversity footprint and which potentially could commit to reducing it.

Max. drawdown since inception		-17.57%	14/10/2024	07/04/2025	
Volatility	,	e magnitude of an asset's price fl			of its risk

Volatility	Volatility measures the magnitude of an asset's price fluctuations and thus provides an estimate of its risk (mathematically, volatility is the standard deviation between the asset's returns).
Tracking error	This is the measure of the risk taken by the portfolio relative to its benchmark.
Sharpe ratio	The Sharpe ratio measures the difference between the portfolio's return and the risk-free rate divided by the portfolio's volatility.
Information ratio	This is the difference between the portfolio's return and the benchmark's return divided by tracking error.
Beta	The beta is the measure of the portfolio's sensitivity relative to its benchmark.

Monthly Comments

In September, the US Environmental Protection Agency (EPA) announced its decision to maintain the rule introduced under the Biden administration, which designates several persistent pollutants such as PFOA and PFOS as hazardous substances under the US CERCLA environmental regulation, making polluters responsible for cleaning up these pollutants. This announcement reflects increased regulatory momentum to combat contamination by these substances. The widespread adoption and extension of water technologies will be of paramount importance in addressing these concerns. With companies such as Xylem and Zurn Elkay Water Solutions, Tocqueville Biodiversity ISR is overweight this theme.

Tocqueville Biodiversity SRI underperformed its performance indicator in September, penalised by its positioning on Materials and Technology. The main relative positive contributors over the period were SABESP (+9.6%), Ebara (+8.4%), Prysmian (+12.6%) and ASML (+30.1%). Conversely, the biggest relative negative contributions came from Tetra Tech (-8.8%), Givaudan (-4.0%), Owens Corning (-6.2%) and Clean

In September, we added to Home Depot, Badger Meter and Owens Corning, while reducing Nvidia and Prysmian.

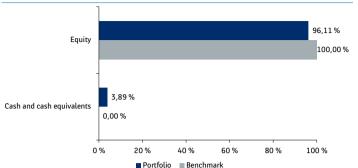

The percentage of sustainable investment presented here is based on the LBP AM Group's proprietary methodology, available in full on our website: https://cdn.lfde.com/upload/partner/sfdr-methodologie-investissement-durable.pdf **LBP AM**

TOCQUEVILLE BIODIVERSITY ISR R

MONTHLY ESG REPORT AS OF 30 SEPTEMBER 2025

GREAT PROFILE OF THE PORTFOLIO

ESG approach	Selectivity ¹
Selectivity rate ²	25%
Portfolio's lowest GREaT score ³	5.85
Pivotal GREaT score ⁴	5.05

The GREaT score is based on an ESG analysis methodology proprietary to the LBP AM Group. The GREaT score scale ranges from 1 to 10, with 10 representing the highest ESG quality of an issuer.

- ¹ The ESG 'selectivity' approach excludes from the comparison universe a percentage of issuers corresponding to the selectivity rate present on the exclusion lists applicable to the portfolio and/or those with the lowest ratings.
- ² The selectivity rate is the percentage of the comparison universe excluded for ESG reasons.
- ³ The lowest GREaT score in the portfolio must be higher than the pivotal GREaT score.
- ⁴ The pivotal GREaT score is the score of the last issuer excluded from the comparison universe after removing a percentage of issuers corresponding to the selectivity rate. The portfolio can then invest in any issuer whose GREaT score is higher than the portfolio's pivotal GREaT score.

ESG: Environmental, Social and Governance criteria

To find out more about the composition of the comparison universe, please consult the fund prospectus.

GREAT METHODOLOGY

Responsible governance

Encourage the dissemination of best practices in terms of corporate governance and business ethics.

Sustainable Resource

Sustainable management of human and natural resources: respect for human rights, development of labour laws, sustainable relations with suppliers, environmental protection.

Energy Transition

Mitigating climate risks by supporting the transition from a high-carbon economic model to a more sober and sustainable model

Territorial Development

Type of comparable

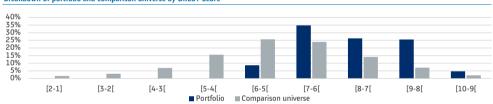

Comparison universe

Promote responsible practices that meet the Sustainable Development Goals and create value for all stakeholders in the value chain

	Portfolio	Portfolio coverage	Comparable	Comparable coverage
G - Responsible Governance	6.71	100.0%	5.61	99.9%
R - Sustainable Resource Management	6.79	100.0%	5.73	99.9%
E - Energy Transition	7.07	100.0%	5.80	99.9%
T - Territorial Development	7.01	93.8%	5.90	86.7%

As the fund does not make any performance commitments relative to its peer group on the GREaT pillars, the portfolio's rating may be higher or lower than that of its peer group.

TOCQUEVILLE BIODIVERSITY ISR R

MONTHLY ESG REPORT AS OF 30 SEPTEMBER 2025

PORTFOLIO SUSTAINABILITY INDICATORS

	Portfolio	Minimum commitment
Percentage of Sustainable Investment	86.7%	80.0%

According to the European SFDR (Sustainable Finance Disclosure Regulation), sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The percentage of sustainable investment presented here is based on the LBP AM Group's proprietary methodology, available in full on our website: https://www.lbpam.com/fr/publications/methodologie-investissements-durables

Indicator 1 - Environment	Portfolio	Comparable
Net Zero Alignment	76.5%	51.9%
Coverage rate	100.0%	100.0%

Indicator 2 - Environment	Portfolio	Comparable
Biodiversity footprint - GBS	64.5	86.7
Coverage rate	97.5%	84.6%

Indicator 1 methodology:

Indicator name and source	Definition	Unit of measure
Net Zero trajectory Source(s) : CDP_TEMP	Share of companies whose greenhouse gas emission reduction targets are validated by SBTI.	%

Indicator 2 methodology:

Indicator name and source	Definition	Unit of measure
Biodiversity impact (BIA-GBSTM) Source(s) : CDC_BIO	GBS: Global Biodiversity Score - estimate of a company's impact on biodiversity, taking into account is historical activity, related to land artificialisation, overexploitation of resources, pollution and climate change. The higher the score, the greater the company's impact on biodiversity.	MSA.ppb*/b€ invested

For more information on the methodologies used to calculate sustainability indicators and on our approach as a responsible investor, please refer to the documents available on our website at https://www.lboam.com/fr/publications/methodologie-investissements-durables

The French State's SRI label is valid for a limited period and is subject to reassessment. Furthermore, the fact that a UCI has been awarded the label does not mean that it meets your own sustainability objectives, or that the label meets the requirements of future national or European regulations.

PORTFOLIO'S NON-FINANCIAL OBJECTIVE

The financial product's SRI management approach consists of identifying companies with the best sustainable development practices, according to the management company's analysis.

This analysis is based on the GREaT philosophy, specific to the management company, articulated around the following four pillars:

- Responsible governance: this pillar aims to assess the organisation and effectiveness of powers within issuers (balance of power, executive remuneration, business ethics).
- Sustainable management of resources: this pillar looks at the environmental impact and the management of the human capital of issuers (quality of working conditions and management of relations with suppliers).
- Economic and energy transition: this pillar assesses the issuer's strategy in favour of energy transition (greenhouse gas reduction and response to long-term challenges).
- Regional development: this pillar analyses the issuer's strategy in terms of access to basic services.

Several criteria are identified for each pillar and monitored using indicators collected from non-financial rating agencies (MSCI ESG Research, Moody's ESG and EthiFinance Ratings).

The methodology used reduces bias, particularly capital and sector bias.

Ultimately, the management company is the sole judge of an issuer's non-financial quality, which is expressed:

- According to a GREaT score between 1 and 10 - 10 representing the best ESG quality of an issuer.

In addition, the management company applies sectoral and normative exclusions designed to limit investment in issuers with excessive adverse impacts. Our sector exclusion lists include certain issuers from controversial sectors such as tobacco, gambling, coal, oil and gas, according to criteria defined by the management company. Our normative exclusion list is based on analyses of ESG controversies or allegations and identifies cases of severe, systematic and uncorrected violations of ESG rights or infringements. In addition to the management company's common exclusion base, portfolios that hold the French government's SRI label comply with the mandatory exclusions listed in its guidelines.
